'batchDateContFlg' and 'batchDateFifoFlg' fields are added in 140BA.STKMAS, which is to define whether this stock will apply date batch control when in/out inventory.

When the 'batchDateContFlg' is 'Yes', BatchDate is asked to be filled in when the stock goes in inventory, and when the stock goes out, BatchDate is mandatory to be assigned and enough quantity of this BatchDate should be in the store to minus.

'batchDateFifoFlg' is usually to be 'Yes' when 'batchDateContFlg' is 'Yes' to enable system get 'batchDate' from inventory automatically with batchDate FIFO logic.
